Summary

Software developer with extensive experience in Chile's public procurement market (Mercado Público / ChileCompra), working with suppliers across industries including healthcare, food and technology. I design and build, end to end, the solutions that help them understand and compete in this market, from pipelines that process tenders and purchase orders to AI-driven classification of pharmaceutical products and market intelligence platforms. Alongside this, I lead the development of Re-Volt OpenGL (RVGL), the cross-platform C/C++ rewrite of the classic 1999 racing game Re-Volt.

Experience

- **Aukko** — Santiago, Chile (Remote)
  Senior Software Engineer — *May 2024 – Present*
  - Build data pipelines that collect and process tenders, procurements quotations and purchase orders at scale, integrating the Mercado Público API into automated and reliable processes.
  - Develop AI and LLM-based classification systems for the pharmaceutical industry that extract key data from unstructured public purchase records and match medications and medical supplies to their commercial presentations.
  - Design and manage the AWS infrastructure, CI/CD pipelines and production deployment workflows.
  - Work directly with clients and with the sales and operations teams to gather requirements and turn them into production-ready software solutions.
- **University of Bío-Bío** — Concepción, Chile
  Part-time Lecturer in Software Engineering — *Apr. 2024 – Sept. 2024*
- **Chilean Olympiad in Informatics (OCI)** — Concepción, Chile
  Competitive Programming Instructor (C/C++) — *Apr. 2022 – Jul. 2023*

Volunteering

- **GitHub Inc.** — California, United States (Remote)
  GitHub Campus Expert ◇ — *Feb. 2023 – 2026*
  - Led a software development community I founded at my university, focused on spreading the concept of open source.
  - Organised events that promoted collaborative development, open to students of all majors.
  - Created inclusive and safe spaces for students to share programming resources and technology.
- **Re-Volt: OpenGL (**https://rvgl.org**)** — Remote
  Lead Developer, Core Maintainer Team — *Jan. 2022 – Present*
  - Lead the development of RVGL, the cross-platform C/C++ rewrite of the 1999 3D racing game Re-Volt, running natively on Windows, macOS, Linux and Android.
  - Coordinate a multidisciplinary team of developers distributed across the world and multiple time zones, working asynchronously to plan and ship new game releases.
  - Develop and maintain the game's core systems, including vehicle physics, OpenGL 3D rendering and cross-platform online multiplayer.
  - Implement synchronisation fixes for online multiplayer, improving the stability of networked races.
  - Define the version control and release workflows on GitHub/GitLab, and write the technical documentation for each release.
  - Work directly with a community of over 5.000 players, prioritising fixes and new features based on their feedback.
- **Mojang Studios (**Crowdin**)** — Stockholm, Sweden (Remote)
  Volunteer Translator & Proofreader — *2017 – Present*
  - Maintain the Spanish (Chile), English (UK) and English (Australia) localisations of Minecraft and its launcher.

Education

- **University of Bío-Bío** — Concepción, Chile
  Master's in Computer Science — *Apr. 2024 – Apr. 2026*
- **University of Bío-Bío** — Concepción, Chile
  B.Sc. in Computing and Informatics (Software Engineering) — *Mar. 2020 – Feb. 2024*

Speaking

- **Contributing to Open Source, a practical guide** ◇ — Santiago, Chile
  Invited by GitHub to give a talk on how to contribute to open-source projects at DUOC UC. — *04/2024*
- **Ruby on Rails Workshop** ◇ — Concepción, Chile
  Introduced Ruby on Rails for full-stack web development. — *09/2023*
- **Git/GitHub Workshop** ◇ — Concepción, Chile
  Presented Git and GitHub's fundamentals, along with practical exercises for all attendees. — *08/2023*

Certifications

- **GitHub Foundations**: https://www.credly.com/badges/7cc1c714-3511-4d48-8281-8e23089fad25/public_url
- **GitHub Administration**: https://www.credly.com/badges/bc08539a-f512-4f67-9732-b3f33e8e769b/public_url

Technical Skills

- **Languages**: Ruby, Python, SQL, C/C++, Java, PHP, Haml, Sass, TeX
- **Frameworks**: Ruby on Rails, React, NestJS, Django, Liquid, wxPython
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM
- **Cloud & DevOps**: AWS, Azure, DigitalOcean, Cloudflare, Docker, GitHub Actions, Capistrano, Nginx
- **Tools**: Git, GitHub Administration, Sentry, Airflow, Rake, Maven, Gradle, Guice, PyInstaller, SharePoint, vsftpd

Languages

- **Spanish** (Native) **English** (C2) **Italian** (B2)
